WHO WE ARE

Fabric architecture, engineered like infrastructure.

Aeromax Structure is a Kota-based manufacturer and installer of tensile fabric and membrane structures. We work across resorts, industrial plants, stadiums, airports and residential terraces — turning open space into shaded, sculptural, all-weather architecture.

Every structure is custom-engineered: from load analysis and fabric selection to fabrication and on-site installation. We use premium membranes from globally trusted mills and back each project with disciplined logistics.

What drives us

Built to Perform

Proper load and wind analysis on every span.

No-Compromise Fabric

Architectural-grade membranes from trusted mills.

In-House Fabrication

Cutting, welding and steelwork by our own team.

Clean, On Time

Disciplined logistics and an honest schedule.

LEADERSHIP

The people behind Aeromax.

FOUNDER & MANAGING DIRECTOR

Mohit Joshi

Leads vision, engineering & delivery.

CO-FOUNDER

Abhimanyu Singh Chouhan

Drives strategy & partnerships.

OUR PARTNERSHIP

A partnership built on engineering discipline and a drive to raise the standard of fabric architecture in India — one project at a time.

WHAT WE BUILD

A full range of solutions.

- **Tensile Structures**

Domes, canopies, conical & cantilever forms

- **Car Parking Sheds**

Membrane parking for homes, offices, commercial

- **Pagoda Tents**

Event & exhibition tents, quick to deploy

- **Industrial Sheds**

Large-span covers for plants & warehouses

- **Specialty Structures**

Stadiums, airports, pools, auditoriums, walkways

- **Architectural Fabric**

Serge Ferrari, Sattler & custom-printed membranes
